TOWEL WARMERS & RADIATORS

VOGUE UK

EST | 1990

Welcome to Vogue UK Ltd – the country's leading manufacturer of heated towel rails, designer radiators and accessories. Established in 1990 within the heart of the West Midlands. Vogue UK continues to design and create more products than any other company in this field, constantly leading the trend by combining fashion with functionality.

Everyone has their own sense of style and that's why Vogue UK has created a range of quintessential products that meet the needs of every interior design style. If you require something unique then our craftsmen can create a design to your exact brief. As Vogue UK have been creating towel warmers and designer radiators since 1990, the company has built an extensive portfolio of designs and can offer a bespoke service, ideal if you're looking to create an authentic period look or simply match an existing design.

The products designed for you in this brochure and on our website are sure to encompass the perfect design for you... no matter what shape, format, style, size, or finish you're looking for.

CONTEMPORARY THROUGH TO TRADITIONAL

We've been at the forefront of towel rail and radiator design for 35 years. It's easy to see why.

We work with some of Britain's leading interior designers who create a portfolio that's unlike anything else. Full of inspiration and innovative design in stunning colours and finishes, we turn heating your room into a style statement.

We know every interior is unique in so many ways and we've created ranges that reflect the style and personality of our homes today. From timeless classics, engineered for modern life, to leading contemporary design that gives you a glimpse of the future - whatever your style, you'll find what's right for you.

Fashion & functionality, beautifully manufactured.

Celebrating **35 Years** of designing and crafting towel rails in the UK.

For 2025/26 you will see our product range of environmentally friendly aluminium expanding. With very high thermal conductivity and excellent corrosion resistance, aluminium is a perfect material for towel warmers and radiators. Metallic finishes such as brushed bronze and brass are proving to be popular and have been further represented throughout our ranges.

The evolution of the heated towel warmer stretches way back into the 1800’s. In 1834 a man named Denison Olmstead of New Haven, Connecticut created a heat exchanger for his stove which he described as a ‘peculiar kind of apparatus, which I call a radiator’. However, it wasn’t until 1855, Franz San Galli of St. Petersburg invented the heating radiator.

So the journey began... the radiator became more popular and spread to every room in the home. Once heating reached the bathroom it became unrealistic for towels to dry and pile-up on the radiator and so, the inevitable arrival of the towel warmer came to pass.

The 1920’s saw the first of the cast iron water heated towel warmers, commonly referred to as a ‘bath radiator’. Here in the UK, drying racks, heated towel warmers and heated towel bars were seen as luxury items and would only ever be found in homes and hotels of high upstanding social status.

As time passed, new materials became available and our abilities to manipulate and manufacture these materials grew. Materials such as copper, brass, mild steel and stainless steel helped to propel the industry forward.

Arriving in the present day and now we have yet more advancement brought to you by Vogue UK, who for 35 years has been manufacturing and innovating many towel warmer styles and designs for bathroom interior design.

SYMBOLS GUIDE

BRASS MANUFACTURE

The highest quality brass available in a finish of your choice. Corrosion resistant and provides a superior plated finish. Suitable for all heating and hot water systems.

STAINLESS STEEL MANUFACTURE

Giving an easy to clean finish that is resistant to corrosion and has a high heat output. Suitable for all heating and hot water systems.

MILD STEEL MANUFACTURE

Quality mild steel available in chrome and painted finishes. Suitable for closed indirect heating systems.

ALUMINIUM MANUFACTURE

Lightweight aluminium provides a quick heat up time, thus allowing for greater efficiency with a low water content. Suitable for all heating and hot water systems.

BRASS & MILD STEEL CONSTRUCTION

A combination of handcrafted brass framework combining a mild steel inset radiator.

MILD STEEL & ALUMINIUM CONSTRUCTION

A combination of mild steel framework and aluminium radiator.

CONTEMPORARY

Clean lines, stunning finishes, and amazingly practical too. Make a statement with our range of contemporary designs that are leading the way in modern towel rail and radiator innovation.

The best of contemporary designs are often hard to achieve, yet effortless to look at. At Vogue UK we aim to offer modernity that is less about hype and more about ingrained qualities. The best of finishes on designs that suit contemporary living.

VEGO WALL MOUNTED CN096

A sleek and modern aesthetic with defined lines. Vego offers a bold architectural presence, combining sleek minimalism with striking geometric form. Its open design allows easy access for effectively hanging towels. Finished in Matt Black or Brushed Brass giving a refined, luxurious feel.

For valves and electric elements please see the Accessories & Valves section - VL023 pictured

LADDER RAILS

Who said being practical has to be boring?

Our range of ladder rails combine function and form effortlessly. You can choose from our inspired range where heating your room and warming your towels need never be dull again.

Ladder type rails, often referred to as a multi-rail, were born out of purpose. These models are the well accepted modern classic, with design credentials built around efficiency and space saving. So, why choose a Vogue UK ladder rail? Our offerings are presented in the latest interiors finishes. We offer full ranges in terms of these finishes, sizes and formats. Importantly, Vogue offer matching accessories for these finishes, creating a more satisfying installed product. Features such as hidden air vents for our 25mm ranges also complete the intended look.

In our eyes service counts for something. We look after all our customers and make sure that our after sales requirements are upheld to the standards of our brand.

AXIS CHROME 22MM WALL MOUNTED MD062

Axis has adjustable brackets through the crossbars, offering freedom and ease of installation. The amount of rails are ideal for optimum efficiency. This contemporary rail is a modern example of proficient design. Prices shown are for Chrome finish, central heating models.

VOGUE UK

EST | 1990

TRADITIONAL

Go timeless and give your room a focal point that never fails to impress.

Our range of classic designs, in a stunning choice of colours and finishes, add instant elegance to your room, each is crafted to stand the test of time.

Classic products are now creating new traditions. Interior Designers are incorporating handmade products and blending simple schemes with timeless classical notes. Materials such as solid brass, have an integrity that is clear to see when used as an accent within modern design.

Many Vogue UK traditional products are known internationally for being part of a genre within bathroom interiors. These bold designs encapsulate Britishness with history, culture, design and time honoured craftsmanship.

REGENCY FLOOR & WALL MOUNTED LG004-MS

The classic column radiator towel rail, offering high heat output with Legacy ball joints. Mild Steel manufactured, Chrome finished framework with an integral white mild steel column radiator. Colour options only apply to the inset radiator, not the frame. Other bespoke metallic frame finishes are available at an additional cost, please see page 169 & 170.

 For valves and electric elements please see the Accessories & Valves section - VL008 pictured.

BALLERINA WALL MOUNTED LG010A-MS (Matt Black Finish)

The Matt Black finish of Ballerina takes a classic into modern era, sitting comfortably within contemporary bathrooms. The finish works well with matching matt black taps and showers, or as a contrast with dark furniture and coupled with brushed brass fittings. The three heights of this design offer ample hanging space for your requirements.

MS C E D 15

DESIGNER RADIATORS

Looking for a real statement piece?

Our exclusive designer radiators are constantly leading the trend in interior design. Created by some of the UK's most celebrated interior designers, they are guaranteed to turn heads.

We have put together a collection of radiators that embrace the latest in materials and technology. Designs that work well, whilst enhancing the rooms where they're installed. If you're looking for a focal point or wanting to upgrade the heating of your whole home, our designer offering has attractive possibilities for you.

FLY LINE VERTICAL DR003

Fly Line is a strong, minimalist design ideal for contemporary properties. Available in single or double panel versions with the double panel offering an increased heat output. Colour options are available on single panel Fly Line versions only please see page 170.

CASTERTON HORIZONTAL AU011

A modern approach to classical radiator design. Casterton’s modern columns features simple, rounded forms and offers more substance than standard home style radiators. Lightweight aluminium in this format makes for a robust visual option and marks a new generation of column radiator design. Casterton slots comfortably in both classic and contemporary interiors.

ASTUTE VERTICAL SINGLE DR035

Astute radiators in both horizontal and vertical formats have the range of sizes to furnish a whole home or interiors project. The vertical offering works well in kitchens, utilising the optional towel bar for tea towels. For bathrooms requiring the additional heat of a radiator, this towel hanging option works equally well.

MODE FLOOR & WALL MOUNTED

MS

C

15

Mode suits traditional properties, yet also looks great in contemporary settings. Heights range from 300mm great for under window sills, to a 1800mm tall version. There are many sizes in between.

Available in a wide range of sizes, so you can choose a radiator which exactly suits your space and required heat output. The standard colour finish is white RAL 9016. Other RAL colours are available. Contemporary colours available on 2 & 3 column only. Colour finish options are subject to an eight week lead time, Sizes are subject to manufacturing tolerances.

Wall brackets are included, feet, other fixing accessories and non standard sizes include 5 and 6 columns ranging from 300mm - 2000mm high and detailed on the next pages. For valve finishing options see page 165 - 168.

This service gives the opportunity to order non standard sizes. Choose from wall or floor standing. These radiators are supplied in white RAL 9016. Coloured finishes are available, please see page 170 for colour options. Please note, contemporary colours available on 2, 3 & 4 column only. The lead time for delivery is approximately eight weeks. The sections cannot be joined on site. We only supply complete radiators, practical considerations need to be given to weight, carriage, handling and accessibility. Where necessary large radiators can be supplied in module format.

Maximum number of radiator sections for bespoke models is 44.

CALCULATIONS FOR SIZING A RADIATOR

REQUIRED OUTPUT IS 1200 WATTS

Space available is 1000 mm high x 750 mm wide.
Approx radiator dimensions 900mm high x 600mm wide.
(Taking into account space for valves)

NUMBER OF SECTIONS POSSIBLE

Width (600mm) divide by 45mm per section
+ allowance for each side.
600 - 24 divided by 45 = 12 sections.

HEAT OUTPUT PER SECTION

Divide your required output by sections.
1200 watts divided by 12 = 100 watts per section.

SELECTING YOUR RADIATOR SECTION

4-750 @102 watts per section.
Therefore 12 sections @102 per section = 1224 watts
@ 50 degrees C delta T.

PRICE CALCULATION

12 x 43.00 =516.00 ex VAT,
Plus feet if floor standing and any other non
standard support brackets you may require.

DIMENSIONS

The nominal overall length of a radiator = number of section
x 45mm = 24mm for reducing bushes (12mm each end).
Subject to manufacturing tolerance of +/- 0.7mm (1.5%)
per section.

ARALINE MD096

Enhance your bathroom experience with the perfect fusion of luxury and practicality with Araline, the electric heated towel rail with integrated digital & touch controls. Take full control with the built in digital interface or smart phone app. Adjust temperature settings, set timers or activate energy saving modes with a simple touch.

Control your towel rail from anywhere via a smart phone app.
Set heating times to match your routines so you will always have dry warm towels when you require them.
Equipped with a countdown timer, which automatically turns off the towel rail after a set period, for energy saving.
Use smart scheduling to ensure you only heat the rail when required; cutting energy costs.
Araline also uses touch control display technology to regulate the towel warmer when the app is not to hand.

ELECTRIC UNDERFLOOR HEATING

There is nothing that quite matches the comfort of warm feet when getting out of the bath or shower, especially in the cold winter months! Imagine stepping onto warm tiles controlled to the temperature you prefer.

Electric underfloor heating works by gently warming the mass of floor which in turn warms the rest of the room. Our underfloor heating kit is quick and easy to install. Ideally timed when you are fitting a new kitchen or bathroom. Electrical components are covered by a two year warranty.

KIT INCLUDES

HEATING KIT

- The correct size heating mat.
- Digital touch screen timer and thermostat.
- Floor sensor and floor sensor mounting pipe.
- Multimeter to check installation at every stage.
- Comprehensive installation manual and control card

PUTTING YOU IN CONTROL

The digital touch screen, completely programmable timer and thermostatic controller enables you to fully regulate the temperature and control when the heating is on or off. The manual override means at the touch of a button the temperature can be higher or lower to suit as and when it is needed.

SILENT Design 100

- Silent elastic blocks
- Sealed for life ball bearings
- Back draught shutter and airflow guide vanes
- High performance and quality
- Incredibly silent running
- Energy efficient
- 8 Watts / 230 Volts
- IP45 rated

A range of 100mm domestic axial extract fans for wall or ceiling installations, designed to solve ventilation problems in WC's and bathrooms. Fitted with motors mounted on silent elastic blocks, the fans deliver incredibly silent running and exceptional performance and stylish design.

ECO dMEV

- Up to 6 adjustable trickle speed settings
- Timer, humidity sensor and pull cord models
- Complies with Building Regulations. Part F for system 3 Continuous Mechanical Extract
- SAP Appendix Q eligible achieving a low specific fan power of 0.28 W/l/s
- Incredibly silent running - Below 20 dB(A)
- One fan for all situations, both walls and ceilings
- Low Energy DC 1.5 Watts - Low voltage version available
- 4 Interchangeable front panel trims

The ECO dMEV has been designed and developed to offer the market a constant volume, continuously running, decentralised extract fan for the lowest power consumption, the lowest noise and lowest lifecycle costs.

SILENT MV

- Sound absorbent insulation
- Incredibly silent running
- 360° rotating connection box
- Sealed for life ball bearings
- Fitted with a two speed motor
- Complies with building regulations
- High performance with flexible location
- Easy installation and maintenance
- IP44 rated

The SILENT MV fan range offers one of the most versatile fan systems on the market today. Due to its flexibility it can be used in a multitude of small and medium fan installations. Especially advantageous in applications where the system may be running for long periods throughout the day, the acoustic benefits of the SILENT MV fans ensure that optimum comfort is achieved without the disturbance of noisy ventilation systems.

SILENT 100

- Also available in silver on silent elastic blocks
- Sealed for life ball bearings
- Back draught shutter and airflow guide vanes
- High performance and quality
- Incredibly silent running
- Significant energy savings
- 8 Watts / 230 Volts or 13 Watts / 12 Volts options
- IP45 / IP57 SELV version

100mm domestic axial extract fans for wall or ceiling installations. Designed to solve ventilation problems in WC's and bathrooms. Fitted to motors mounted on silent elastic blocks, fans are incredibly silent running and exceptional performance.

ACCESSORIES & VALVES

For the perfect finishing touch, enhance and complement your towel rail or radiator with our collection of high quality accessories and additions.

We offer matched valves in various formats for most of our towel rail finishes. This includes painted and metallic finishes in corner, straight and angled valves.

Hand crafted pieces can have valves and accessories finished by our team to match. This level of finishing sets the Vogue UK offering apart.

All electric, drylined and dual fuel options are catered for within many of our products. Our technical sales team are here to help you with specific questions.

Further information, images technical drawings and our BTU calculator are easy to find on the Vogue UK Website.

ELECTRIC ELEMENT ONLY PRICES

Standard Element

IP55 Suitable for zones 1 and 2 of the bathroom. Each standard element contains a pre-set surface temperature control along with a back up fail safe, this is the only temperature control supplied, for more flexibility over the surface temperature we recommend using our AC012 (rheostat), this will give you surface temperature modulation, when fitted into the electrical supply circuit.

AC040	N/A	18.90	22.68

Heat Sensor Element

IPX5 suitable for zones 1 and 2 of the bathroom. Five temperature settings ranging from 30°C to 60°C. The device displays the temperature to which it is currently set and indicates the status of the heating cycle. Finish options: Chrome, White, Black or Gold.

Element Cable Length 1.5 MTR

Heat Sensor Element Cover Shroud

An optional accessory to hide the cable See page 156. Can be used when depth from wall to centre is the max of 70mm.

Electronique Element

IP66 Suitable for zones 1 and 2 of the bathroom. The standard Electronique element is set to a constant surface temperature of 52°C, with no need for external controls. In the fully loaded towel warming mode it will act to reduce power and save running costs. In space heating mode it will increase the power to deliver background heat needed to the maximum of its rated capacity. A safe to touch system, with safety measures incorporated.

Element Cable Length 1.0 MTR

Contract Fixed Heat Electronique Element

IP55 Suitable for zones 1 and 2 of the bathroom. Fixed Heat is designed as an energy saving element to control temperature and consume only the correct amount of power required. It maintains your pre-set temperature whether the rail is in a cold bathroom empty or fully loaded with towels. Fixed Heat for LST (low surface temperature) of 43°C must be chosen to comply with LST legislation for use in public buildings, hospitals and care homes.

Element Cable Length 1 MTR

AC003

Conversion tee for dual energy radiators. Available in Matt Black and Anthracite from £40.95 ex VAT and £49.14 inc VAT. Other popular finishes are available, please contact our sales team.

HEATING OPTIONS

FITTED BY US

ELECTRIC & DUAL FUEL PRICES

This section contains a range of elements with price supplements for electric and dual fuel models. Please add the price of your element to the model you choose and we will build it for you.

HEATING ONLY OPTIONS

H

Is suitable for all heating and hot water systems. For connection to either direct (open) or indirect (closed) central heating systems.

C

Suitable for indirect (closed) central heating circuits only. It cannot be installed on an open circuit due to the product containing ferrous (steel) parts.

Standard Rail Option (H) and (C)

Multirail Option (H) and (C)

ELECTRIC ONLY OPTIONS

E

A completely independent unit requiring only a fused spur electric connection. Thermal transfer fluid is heated by an electric element within the towel rail.

Standard Rail Option (E)

Multirail Option (E)

DUAL FUEL OPTIONS

D

The towel rail has the capability to run from a central heating circuit or an electric element. Handy in the summer months when the central heating is turned off.

Standard Rail Option (D)

Multirail Option (D)

ELECTRIC DRYLINE OPTION

DL

Electric dryline technology, with the towel warmer not containing any fluids. The towel warmer is heated using a silicone heater cable, exiting the towel warmer via a three core cable. This can then be attached to a fuse spur. Only available on specific models, please contact our sales office on +44(0)1902 387000 for further details. POA.

Please Note:

When using the electric element only (i.e.; during summer), allowance must be made for thermal expansion within the product by having the 'return' radiator valve left partially open. The 'flow' radiator valve must be closed to prevent back flow through the system. Both valves should be opened and balanced when the central heating system is operative, (i.e. during winter). Steel Rails - Must be installed in accordance with BS7593 where a corrosion inhibitor is used. Brass Rails - Caution where water softener is installed, as this could cause dezincification (material is attacked i.e. Zinc eaten away by aggressive water).

Brass towel warmers are manufactured using dezincification resistant brass, however it should be understood that the term 'resistant' does not entirely preclude the possibility of dezincification occurring. If you intend to install the product on an open (DHW) circuit, make reference to your local water authority to ensure dezincification has not previously occurred. Towel warmers manufactured from brass tubing should not be installed on an open circuit if a water softener is present. Water analysis to determine the likelihood of dezincification is available at cost. Models suitable for indirect (closed) circuits only cannot be installed on an open circuit due to the item containing ferrous (steel) parts. Product compatibility is the responsibility of the installer.

Standard Element IP55

A benchmark element to suit each size of product.

- E Electric Only £211.05 ex VAT, £253.26 inc VAT
- D Dual Fuel £144.90* ex VAT, £173.88 inc VAT

- D Dual Fuel £249.00* ex VAT, £298.80 inc VAT

Code EE009

Wi-Fi Temperature Control Electric Element

Ideal for smart users across all towel rail types.

- E Electric Only £339.00 ex VAT, £406.80 inc VAT
- D Dual Fuel £274.00* ex VAT, £328.80 inc VAT

Code EE0010

* Dual fuel models will also be supplied with a conversion tee where applicable. This can be used with VL013 valves for a multirail. Alternatively, to a conversion tee dual fuel valves VL015 can be used. All the images of elements depict electric only versions. Dual fuel configurations may vary including element positioning. The appropriate standard versions will be supplied in all cases unless advised otherwise. Electric towel warmers are filled with a glycol ethylene / water mix to strict guidelines. This improves the thermal transfer rate and acts as a corrosion inhibitor. All electric and dual fuel towel warmers must be fitted by a qualified person. The elements are fitted on the right hand side as standard. They can be left hand mounted on request, on certain rails only. Dual Energy units are supplied with matching tee pieces wherever possible. Please consult with Sales to confirm suitability and pricing for your own requirements.

ΔT
DELTA T CONVERSION

WHAT IS DELTA T?

Delta T, or ΔT, is the difference in temperature between water circulating in the central heating system and that of the room temperature.

If the room temperature is 20°C and the water temperature inside the radiators is 70°C, the value is calculated as:-

Temperature of water inside radiator is 70°C
Minus the room temperature 20°C
= (Delta T or ΔT) 50°C.

Delta T 50° is the UK's standard for all domestic boilers.
It allows you to make a comparison of hydronic radiator and towel rail outputs from various suppliers.

DELTA T CORRECTION FACTORS - DELTA T 50°

A Delta T correction factor allows you to find out the BTU output of a radiator or towel warmer in the range of Delta T variations.

Example: Assuming a radiator or towel rail has a heat output of 1000 BTUs at ΔT (Delta T) = 50° (1000 x 1 equates to 1000 BTUs)

At ΔT (Delta T) = 40° the output would be 1000 x 0.75 equating to 750 BTUs.

DELTA T CORRECTION FACTORS - DELTA T 30°

Delta T30 is based on a cooler water temperature of 55°. These temperatures are typical of heat pumps and greener energy methods of heating.

At ΔT (Delta T) = 30° the output would be 1000 x 0.51 equating to 510 BTUs.

Delta T	Correction Factors
75°C	1.69
70°C	1.55
65°C	1.41
60°C	1.27
55°C	1.13
50°C	1
45°C	0.87
40°C	0.75
35°C	0.63
30°C	0.51
25°C	0.41
20°C	0.3
15°C	0.21
10°C	0.12
5°C	0.05

IP RATING & BATHROOM ZONES

IEE Wiring Regulations have identified the following zones and IP ratings to ensure safety.

ZONE 0	Inside the bath or shower. Any fitting here must be SELV (max 12v) and a minimum rating of IPX7. (Protection against immersion in water).
ZONE 1	Above the bath or shower to a height of 2.25m. A minimum rating of IPX4 is required * See note 1.
ZONE 2	The area stretching to 0.6m outside the bath or shower and above the bath or shower if over 2.25m. A minimum rating of IPX4 is required * See note 1.
OUTSIDE ZONES	Anywhere outside zones 0, 1, and 2. Where water jets are not used for cleaning purposes, the general rules BS7671 apply. * See note 1.

- In zones 1 and 2 if there is a likelihood of water jets being used for cleaning purposes a minimum of IPx5 is required.
- Where ceiling heights exceed 2.25m, the zones are effectively up to 3m, beyond 3m the walls are out of scope.
- All final circuits require 30mA RCD protection. Information contained on this page is for guidance only. Please refer to current IEE Regulations or a qualified electrician.

IP Rating Guide

The IP (ingress protection) rating given to an enclosure, states the degree of protection it offers by means of two digits. A summary of these are detailed below. For more information please see British BS EN 60529:1992, European IEC 60509:1989

DUST		MOISTURE	
1	Protected against solid objects larger than 50mm e.g. touch of a hand.	1	Protected against vertically falling drops of water e.g. condensation.
2	Protected against solid objects larger than 12.5mm e.g. fingers.	2	Protected against direct sprays of water up to 15° from the vertical.
3	Protected against solid objects larger than 2.5mm e.g. tools and cables.	3	Protected against direct sprays of water up to 60° from the vertical.
4	Protected against solid objects larger than 1mm.	4	Protected against water splashed from all directions - limited ingress permitted.
5	Protected against dust (no harmful deposits).	5	Protected against low pressure jets of water from all directions - limited ingress permitted.
6	Totally protected against dust.	6	Protected against strong jets of water e.g. for use on ship decks - limited ingress permitted.
IP65		7	Protected against the effects of temporary immersion in water between 150mm and 1m.
		8	Protected against continuous submersion at a specified depth.

Log onto our BTU Calculator to see how many BTU's your room size needs. www.vogueuk.co.uk/btu-calculator

IEC 529, bs en 60529 does not apply to any risk of explosion or conditions such as humidity, corrosive gases, fungi or vermin. In certain cases equipment designed to be mounted in an enclosure will contribute towards the stated IP rating (eg Push buttons mounted in an enclosure). Different parts of enclosures can have different degrees of protection and still conform to the standard (e.g. Enclosures with pre-drilled conduit entry). All information strictly for guidance only, please refer to regulations and manufacturers for information if you are in any doubt.

ACCESSORIES

AC002
Ball vent

AC003
Dual energy conversion tee
Available in Matt Black and Anthracite.
(Other finishes also available).

AC004
Valve sleeves Chrome

AC005C
Valve sleeves White,
Anthracite or Matt Black

AC005
Connection
tubes

AC006
Street elbow
connection tubes

AC010
Round or square metal cover plates

AC007
Electric element shroud covers. Shown as standard in Chrome.
Other finishes are available.

*Please be aware that some cover shrouds conceal the element block and cable but NOT the service nut. If unsure, please ask your Dealer for more information prior to ordering.

AC011A or B
Arre straight or angled fixing kit
Also available in contemporary colour finishes

AC011F
Crosshead angled fixing kit

AC011S
Piazza angled fixing kit

AC012 Voltage Regulator
A manual controller to manage power
consumption to your towel warmer

AC013 7 Day Timer
Control the time of day the towel rail on

AC014 Pattress Plate
Housing the wires from the towel rail
element if no external controller is required

Polished Copper Plate **(PCP)**
£ POA

Brushed Copper Plate **(BCO)**
£ POA

Please Note: Polished Brass and Polished Copper tube finishes, are supplied in a raw, un-lacquered finish, as standard. This un-lacquered (ie; unprotected) base material will discolour in a short period of time and will therefore require regular cleaning in order to maintain the finish. To add a lacquer to preserve the finish, add an additional 20% to the un-lacquered price. Brushed Brass will be supplied as a lacquered finish only and subject to an additional 20% supplement charge on top of the chrome finish price.

The supplements displayed on this page are only to be added to brass manufactured towel rails, please see the individual product page for full material information. Individual mild steel supplements can also be found on the product page. For more information regarding pricing call sales on 01902 387 000.

Antique Brass, Antique Bronze, & Antique Copper - Due to the reaction between the solution with the base metal there will always be a degree of natural variation in shading between different components.

INNOVATION

Vogue UK is a vibrant organisation with research being conducted in many technology disciplines. This research results in exciting products as evidenced throughout the design collections we offer. Vogue UK has set itself a clear objective: both through consistent preservation and long tradition of British craftsmanship and meeting its high standards, as well as creating, with its very own innovative heating developments, contemporary design and a heightened passion for detail and perfection.

Those who appreciate lasting value derived from the synergy of traditional craftsmanship, creative development and the latest technology, as well as dedication in seeking the extraordinary know not to entrust any towel rail design but rather to a design crafted from Vogue (UK).

Vogue UK emphasises its creative drive to differentiate its towel rail designs down to the finest detail and its desire to monitor, to the greatest possible extent, the development and manufacture of a hand crafted product. We use the latest technology to produce low-volume individual parts with high added value continuously offering home interiors and connoisseurs of design new, impressive towel rail models.

ENVIRONMENT

Vogue UK has a legacy of core values, rooted strongly in safety, health and environmental stewardship. For 35 years, we have been reducing the environmental footprint of our own operations. Today, footprint reduction is expected of all companies. The challenge – and the opportunity – are products and manufacturing processes that are safer, less toxic, more energy efficient, use less water, less energy, & produce fewer greenhouse gases.

We're working to conserve energy and reduce waste and are exploring the use of sustainable materials and products. Whether we're saving costs by reducing energy consumption or creating covetable products through innovative, sustainable design, we believe that reducing our impact on the environment can also result in positive business benefits.

GENERAL INFORMATION

Bespoke items are non-returnable. Please note that certain non-stock models are also non-returnable, please confirm with our Sales Office on telephone +44(0)1902 387000.

All heat outputs are shown at 50°CΔt, in compliance with BSEN442 - Specification for Radiators and Convectors. To convert to 60°CΔt, multiply heat output by conversion factor 1.264 (approximate figure), to convert to 70°CΔt, multiply heat output by conversion factor 1.549 (approximate figure).

All measurements given are nominal dimensions only (mm) and are not binding. Detailed technical drawings are available on request from our Sales Office on +44(0)1902 387000 or via our website - www.vogueuk.co.uk Manufactured from hot brass stamped fittings and high quality brass tube complying to BS EN 12449:2016+A1:2019. Some models are manufactured from high grade CR steel tubing and/or containing steel components suitable for closed/indirect circuits only.

All rails are pressure tested to at least 5.4 bar (78psi) up to a maximum of 13 bar (189psi) air immersed in water. All models are fitted with two ½" BSP F.I. connections. Alternative M.I. or compression fitting is available on request. ¾" BSP F.I. connections are available at extra cost on some models. A manual bleed air vent is fitted to all hot water/dual fuel models. Auto air vents are available on request at additional cost.

In compliance with our policy of constant improvement, we reserve the right to alter specifications, materials and dimensions or discontinue any of our products without prior notice. The colours in the brochure are as accurate as the colour printing processes allow. Photographs and images are for illustrative purposes only. We reserve the right to change specifications without prior notification.

Products ordered incorrectly or where the specification has changed will incur a restock charge. Bespoke/custom made products are non-refundable. Upon the return of a product Vogue (UK) Ltd reserves the right to refuse credit if the product is not made available upon an agreed collection/return in line with the Company's terms and conditions. A copy of the Company's full Terms and Conditions of Trading is available on request.

INSTALLATION

Vogue (UK) Ltd recommends that preparatory work such as the adjustment of existing pipework, the installation of new pipework, or the advance drilling of holes, etc. is not carried out until the towel warmer or radiator is on site and positioned for fitting.

Pipe centres are provided as a centre to centre tappings using the Vogue (UK) range of valves. Valves are NOT supplied with each product. Please see Valves & Accessories section for further details.

All installations of a Vogue (UK) Ltd towel warmer or radiator should be in accordance with the following British Standards;

- BS 7593:2019 Code of Practice for the preparation, commissioning, and maintenance of domestic central heating and cooling water systems
(In short, clean, protect, test & maintain).
- BS EN 14336:2004 Heating systems in buildings – Installation and commissioning of water-based heating systems
- BS EN 12828:2012 Heating systems in buildings – Design for water-based heating systems.

EN442.1 & 2

Where applicable product within this publication has undergone independent testing to verify heat outputs are in accordance with the parameters laid down in the above European standards.

EN60335

Household and similar electrical appliances. Safety. Part 2 - 43 : 2003 + A2 : 2008. Where applicable all product within this publication utilising an electrical heating component, conform to the above safety standard.

ISO 9001:2015 CERTIFIED

Vogue (UK) Ltd is proud to be ISO 9001: 2015 certified.

Quality is utmost in importance to our organisation, in both the products and services we provide our customers. Reflecting this commitment, Vogue (UK) Ltd implemented and received certification of our Quality Management System in accordance with ISO 9001:2015.

CONSTRUCTION PRODUCT REGULATIONS (CPR)

In compliance with the above, Vogue (UK) Ltd (The company) holds declaration of Performance Certificates (DoPs) for all products covered by the Harmonised Standard EN442.1 / 2. Copies of relevant certificates are available on request. Some products at the time of print may be awaiting confirmation.

Product with a declared heat output of 200 Watt or less 50 degree C Delta T are not classified by The company as heating appliances and are therefore not covered by the above. All individually manufactured bespoke products are similarly exempted from the above legislation.

WARRANTY

Vogue (UK) Ltd is a company that celebrates the wealth of traditional, quality handcrafted heated towel warmers and radiators and is one of the last true manufacturers in the UK. Vogue branded towel warmers supplied and installed within UK are also covered by an extended 2, 15, or 30 Year product warranty – subject to our business trading Terms & Conditions against manufacturing defects. Components such as inset radiators, not of our manufacture, which become faulty by reason of defected materials, come with a 2 year warranty only.

CONTINUAL IMPROVEMENT

Our company policy is one of continual improvement and Vogue (UK) Ltd reserves the right to amend designs, specification or discontinue any of our products without prior notice. E & OE.

CARRIAGE

Paid UK mainland, excluding requests for next day service, Export carriage can also be arranged. Please contact our Sales Office for details on telephone +44(0)1902 387000.
